

3. Entertainment

My favourite kind of entertainment is going to the cinema. Every time they start showing a new film, I go to the mall with my friends. It's sometimes difficult to decide which film to watch, because some of my friends like comedies and others prefer adventure films. Eventually, we always agree, often on the basis of who features in the film. We all buy tickets at a reduced price, as we have student cards.

I also like playing computer games and reading magazines, especially on fashion, wellness and free time activities. When I have more free time, I like reading crime stories too.

A couch potato is a person who spends all his time sitting and watching television. Personally, I don't often watch TV. I'm not interested in most of the programmes they offer. I like documentaries and films on nature though. I usually watch movies or series on Netflix. You have to pay a monthly fee and then you have access to a variety of programmes. I like watching movies and series with subtitles because they help me to improve my language knowledge.

I think playing computer games doesn't kill a social life but contributes to it, because you can play with your friends. People like talking about different computer games, so you can belong to a group of gamers. You can also get to know people from all over the world. This way you can practice your language skills. However, you have to be careful not to spend too much time in front of the screen.
